Goodwill Commercial Services receives FDA registration

Goodwill Commercial Services recently received Food & Drug Administration (FDA) registration to be a repackager/relabeler for the life sciences industry.

According to the FDA, the registration includes but is not limited to:

- Repackaging of solid and liquid bulk-dosage forms into smaller packages; and
- Contract packagers who package expressly for manufacturers of dosage forms.

Receiving the registration also increases business potential for Goodwill Commercial Services.

“Having FDA registration as a re-packager and re-labeler positions us to be able to meet requirements for other customers who may have the same need,” says Frank Langan, Director of Operations, Goodwill Commercial Services.

Goodwill Commercial Services provides quality, reliable, on-time outsourcing services to assist local, national and international companies with their production and assembly needs and is certified to ISO 9001:2008 standards. Commercial Services also provides employment opportunities and work experience for people with disabilities and others who have limited vocational opportunities. For more information about Commercial Services, visit www.goodwillbusiness.org.
